

Instructions for Voting Using a Keypad

The keypad you were given has a unique serial number.

You will use the keypad when a counted vote is taken.

Press the 1 key to vote **YES**, press the 2 key to vote **NO**, press the 3 key to vote **ABSTAIN**

You will have 20 seconds to vote during which time you can change your vote.

The last key pressed before the voting period is over indicates your vote.

After the voting period, you will see your name and your vote displayed.

When you leave to go home place the keypad in a container located at each exit.

See one of the Keypad Distributors at the check-in table if you have any questions.

Changes from the April Town Meeting

A Wifi device should not be used during the voting period.

The bright white light indicating the voting period will not be used.

A 20 second count-down clock will be displayed on the voting slide.

After you press a key the LED display will show Yes, No, or Abstain to indicate your vote.

When the count-down clock reaches 0 the voting period is over.

Be sure to vote before the voting period is over so your vote will be recorded.

You cannot change your vote after the voting period is over.
